

## Moon Sand

Moon sand is like wet sand and it brushes straight off your hands and clothes. It is also fun to make! You can store it in a Ziploc bag or sealed container so you can play with it again and again.

You will need:

- 8 cups of plain flour
- 1 cup of baby oil (you can also use other oil)
- A plastic box or surface to play with the sand on
- Cutters, toys, moulds to play and make shapes with

Just mix the ingredients together and you're ready to play.

You could even add food colouring, essential oils or edible glitter to the mix to make it even more fun.
