

Paper Plate Alien Spaceship

This activity is out of this world and also really fun to play with or hang up (particularly by an open window so the spaceship moves).

You can be really creative here with how you decorate your spaceship and creating your own alien

You will need:

- Paper plates or bowls
- Silver paint or aluminium foil
- Brushes
- Paint
- Scissors
- Patterned Card
- Stickers and gems
- Craft glue
- Glue stick
- Googly eyes
- Clear plastic cups
- String

To create, you need to:

1. Decorate your paper plates using foil, paint, stickers – anything you want.
2. Whilst the paint is drying, you can create your alien (make sure to do both sides). Leave some room at the bottom of the alien to make into flaps so you can stick onto the spaceship.
3. Tape or glue your alien to the top of your spaceship.
4. Glue a plastic cup over the top of each alien and then glue the plates together.
5. If you would like to hang your spaceship, then you need to create either two small holes at the side of the spaceship or on top of the plastic cup and tie some string through it. You could add extra tape or glue if you want too as well.
